

135mm F2.0

ED UMC

FULL
FRAME

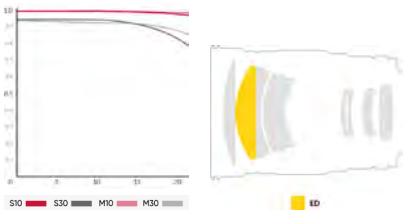

The Samyang 135mm F2.0 ED UMC is a manual focus telephoto prime lens useful for portraiture and most telephoto applications.

Its fast F2.0 maximum aperture is effective in low light and enables shallow depth of field control.

With a rounded 9-blade diaphragm, shallow depth of field imaging will be rendered with pleasing out-of-focus highlights.
