

AF 14mm F2.8 EF New Full Frame

This first EF mount autofocus lens from Samyang encapsulates the brand's universally respected optical technology, especially in the wide angle lens category. The remarkably even image quality from centre to corner of the wide 116.6 degree angle of view appears distinctly on its MTF chart. The minimised weight and movement of the focusing lens group enables quiet and pleasant autofocusing with high accuracy.

- Quiet, fast and accurate autofocus system
- Minimised weight for portability
- Ultra wide angle in 116.6°
- Weather-sealing
- Starburst effects made with 7 blades
- High resolution, crystal clear resolution
