**Tokina Instruction Manual**

**AT-X 16-28mm F2.8 PRO FX**
**AT-X 17-35mm F4 PRO FX**

**FX**

This TOKINA FX Lens is designed for digital SLR cameras with full sized (24x36mm) image sensors.

**Descriptions of Parts**
- Manual Focusing Ring
- Focus Distance Scale
- Focus Distance Index
- Zoom Ring
- Focusing Distance Index
- Hood Attachment Index

**How to Attach/Detach the lens**
- Follow the instructions provided with your camera to attach and detach the lens to and from the camera.

**Caution Regarding Use in a Bulb-Flash**
When the camera is set to Bulb or Flash, the light of the bulb or flash is obstructed by the lens, which casts a large shadow area. Therefore, it is recommended to use an external flash when using this lens.

**Flash Photography (Red-eye phenomena)**
When people are photographed with the aid of a flash, their eyes sometimes become red. This is called "red-eye phenomenon." Follow the manual of your camera for information on how to remove red eye.

**Rotating sense of the focusing ring**
It is just the same as the rotating sense of Nikon and Canon lenses.

**Performance Table**
