

SAL16F28

A superb fisheye lens with a look all its own -- a fascinating perspective on landscapes, cities, crowds and special events. With a 180° angle of view and extraordinary corner-to-corner sharpness, this lens achieves crisp, clear detail from about 8 inches to infinity. Mounted on Sony α (alpha) DSLR cameras, it provides a 110° angle of view with 24mm focal length (35mm equivalent).

A Unique View of the World

With exaggerated perspective and intriguing visual distortion, this fisheye lens brings images closer to the focal plane for a view beyond the ability of human eye.

4 Rotating Filters

Built-in filters can be selected by simply rotating a dial on the lens -- including Normal, 056 for accented contrast in B and W photos, B12 to correct color by eliminating red tones, A12 to correct color by eliminating blue tones.

Specifications
