

- **Sharp Macro Focusing**
You can get closer to your subject to capture low-angle shots of insects, flowers and other natural wonders -- and broad depth of field lets you keep backgrounds in focus too.
- **Bright f2.8 Aperture**
In conjunction with the Super SteadyShot® image stabilization system of the Sony α (alpha) DSLR-A100 camera, this lens captures bright, steady images even working with hand-held camera in low light.
- **High Contrast and Resolution**
Excellent optical precision gives your shots greater visual accuracy for close analysis of your subject.
- **Focus Range Limiter**
Speeds auto-focus response by limiting the range of distances that are brought into focus -- Close-up Range, or Telephoto Range.
- **Focus Hold Button**
For full creative control, a focus hold button located on the lens can lock auto-focusing.
- **Auto Clutch**
In auto-focus mode, the manual focus ring does not rotate -- which improves handling ease.
- **Circular Aperture**
Because aperture blades form a near circle at the wide openings used for low-light shots, spot-light sources have a pleasing circular defocused effect.

Specifications

Optics/Lens

Focal Length: APS: 150mm (35mm
Equivalent: 100mm)
Filter Diameter: 55mm
Minimum Focus Distance: 1' 2.4" (35cm)
Magnification: x 1
Lens Groups-Elements: 8 groups, 8
elements
Distance Scale: Yes
Distance Encoder: Yes
Non-rotating Focusing Ring: Yes
Focus-hold Button: Yes
Depth-of-Field: Yes
Focus-range Limiter: Yes
Lens Type: Macro
Aperture (Max.): f/2.8
Aperture (Min.): f/32
Blades: 9 aperture blades
Aspheric Elements: no aspheric

Dimensions

Weight: 1lb 2oz (505g)
Measurements: 3 x 4" (75 x 98.5mm)

Supplied Accessories

Front and rear lens cap
SH0007 solid-circular lens hood

Color: Black
UPC Code: 027242694408
