for 180° of fun!

8 mm F3.5 UMC Fish-eye CS II

This fisheye lens expresses distortion of field effectively. Hybrid aspherical lens and Ultra Multi Coating technology are used to minimize flare and ghost to deliver exceptional optical performance. Petal hood is detachable.

- Hybrid aspherical lens (H-ASP)
- 180° of wide angle
- UMC technology of Samyang Optics

low chromatic aberration	low coma	low flare & ghost	fast aperture	fisheye
